CORE SERVICES & PRODUCT OFFERINGS

Pyramid Trading PLC delivers end-to-end window covering projects, handling everything from on-site technical measurements and material fabrication to professional mounting and post-installation support.

PYRAMID TRADING PLC
End-to-End Solutions

COMMERCIAL BLINDS

- Vertical Blinds
- Roller Blinds
- Zebra Blinds
- Shutter Blinds

CUSTOM CURTAINS

- Sheer & Drapes
- Blackout Fabric
- Custom Styles
- Hardware Kits

FIELD SERVICES

- Site Survey
- Precision Fit
- Mounting
- Maintenance

SPECIALIZED WINDOW TREATMENT SYSTEMS

01

VERTICAL BLINDS

Stretchable PVC and premium fabric vertical systems engineered for large expanses, floor-to-ceiling windows, and sliding doors. Ideal for office partition shading and light direction.

02

ROLLER BLINDS

Sleek, low-profile shading solutions designed for privacy, heat reduction, and glare control in modern corporate work environments.

03

ZEBRA BLINDS

Modern dual-layer sheer and solid fabric blinds allowing variable light filtering and privacy adjustments.

04

SHUTTER BLINDS

High-durability exterior and interior shutter units engineered for security, weather control, and privacy.

05

CUSTOM FABRIC CURTAINS

Tailored drapery crafted from premium textiles to meet custom architectural and aesthetic requirements.

06

TURNKEY INSTALLATION SERVICES

Certified technician crews delivering site measurements, custom fitting, heavy-duty bracket anchoring, and operational testing.

END-TO-END SOLUTIONS

From consultation and design to installation and after-sales support.

PREMIUM QUALITY

High-grade materials, precision workmanship, and durable performance.

CUSTOMER FOCUSED

Tailored solutions that match your needs, style, and budget.

ON-TIME DELIVERY

Efficient project management ensures timely completion without compromising quality.

AFTER-SALES SUPPORT

Reliable maintenance and responsive support for long-term satisfaction.

SUSTAINABLE & EFFICIENT

Solutions that promote energy efficiency, comfort, and sustainable living.

BLIND SYSTEMS ENGINEERED FOR PERFORMANCE.

Every Pyramid blind is measured on site, fabricated to the exact opening and installed by our own technicians — so the fit, the stack and the light control are right the first time.

These are the three systems we supply most often to corporate, government and residential projects.

01

VERTICAL BLINDS

PVC & FABRIC LOUVRE SYSTEMS

Stretchable PVC and premium fabric louvres for large expanses, floor-to-ceiling glazing and sliding doors. Louvres rotate to direct daylight without losing the view, and a single damaged louvre can be replaced instead of the whole unit.

- ✓ 89 mm and 127 mm louvre widths
- ✓ PVC, fabric and blackout options
- ✓ Chain-and-cord or wand control

BEST FOR

Open-plan offices, partitions, sliding doors, tall windows.

02

ROLLER BLINDS

LOW-PROFILE SHADING

A sleek, low-profile solution designed for privacy, light control and a modern aesthetic. Sunscreen fabrics cut glare and heat while keeping the outward view; **dim-out and blackout fabrics create a room to full darkness.**

- ✓ Sunscreen, dim-out and blackout fabrics
- ✓ Chain, spring or motorised operation
- ✓ Slim tube with optional cassette

BEST FOR

Meeting rooms, workstations, bedrooms, hotel rooms.

03

ZEBRA BLINDS

DUAL-LAYER BANDED FABRIC

Two fabric layers of alternating sheer and solid bands. Align the bands for soft filtered daylight, offset them for full privacy — one blind that handles the whole day, ideal for contemporary interiors.

- ✓ Stepless light and privacy adjustment
- ✓ Cassette or open-roll headrail
- ✓ Contemporary colourways

BEST FOR

Reception areas, lounges, boardrooms, apartments.

MEASURED ON SITE

Technical survey before any order is placed to ensure perfect fit.

FABRICATED TO SIZE

Cut and assembled to the exact opening with precision and quality control.

INSTALLED BY OUR CREW

Certified technicians for precise fitting, secure anchoring and operational testing.

BACKED AFTER HANDOVER

Maintenance and responsive after-sales support for lasting performance.

CUSTOM CURTAINS, SHUTTERS & TURNKEY INSTALLATION.

Beyond blind systems, Pyramid tailors drapery from a library of **300+ fabric options**, supplies engineered solutions and the field service that holds a project together — survey, fitting, testing and maintenance.

01

CUSTOM CURTAINS

SHEERS, DRAPES & BLACKOUT

Diverse fabrics, custom designed for aesthetics and light control. Tailored drapery crafted from premium textiles to meet specific architectural and interior requirements, complete with pelmets, tracks and hardware kits.

- ✓ Sheer and drape combinations
- ✓ Blackout and thermal linings
- ✓ Pleat styles, tie-backs, hardware kits

BEST FOR

Executive offices, hotels, halls, living and bedrooms.

02

SHUTTER BLINDS

INTERIOR & EXTERIOR UNITS

High-durability shutter units engineered for security, weather control and privacy. Adjustable louvres give precise light filtering while the rigid frame adds a permanent, architectural finish to the opening.

- ✓ Interior and exterior specifications
- ✓ Adjustable louvre light filtering
- ✓ Security and weather resistance

BEST FOR

Residential buildings, facades, secure and exposed openings.

03

INSTALLATION SERVICE

FIELD OPERATIONS & MAINTENANCE

Professional installation with on-time delivery and controlled quality. Certified crews handle site measurement, custom fitting, heavy-duty bracket anchoring and operational testing before every handover.

- ✓ Site survey and precision fitting
- ✓ Mounting, anchoring, operational testing
- ✓ Scheduled maintenance and repairs

BEST FOR

Multi-floor fit-outs, phased handovers, contract works.

300+ FABRIC OPTIONS

Sheer, dim-out, blackout and technical textiles.

LIGHT & HEAT CONTROL

Glare reduction and improved energy efficiency.

PRIVACY & SECURITY

From day light filtering to full blackout and shutters.

SUPPLY AT SCALE

Volume delivery for multi-site institutional contracts.

WHERE THE WORK GETS DONE.

Pyramid is a direct manufacturer, not a broker. We hold the stock, engineer the materials, and deploy our in-house, dedicated fabrication and installation teams on-site. This mediuals tours on-site. This ensures unmatched precision, absolute delivery accountability, and a single point of contact for every client, from concept to handover.

FAB fabrication workshop ✂️ 📦

CUT • ASSEMBLE • INSPECT

Every order is cut and assembled in-house against the dimensions recorded on site. Headrails, louvres, tubes.

- Advanced cutting, precision hemming, and high-frequency heat-sealing stations
- Specialized headrail and core hardware assembly lines
- Full dimensional and component checks against survey data
- Dedicated quality control, cleaning, and room-specific packing

fabric library & intelligent store

300+ OPTIONS IN STOCK

Our store carries the fabric library clients choose from, plus the components that keep projects moving: brackets, tracks, chains, tubes and spare louvres. Holding stock is what allows us to quote short load.

- Massive textile inventory, over 300+ options
- Automated tracking for dynamic stock management
- Immediate component access for dynamic order fulfillment
- Multi-site and large tender fulfillment capacity

expert workforce

DIRECTLY EMPLOYED • CERTIFIED PROFESSIONALS

Measurement technicians, fabrication staff and installation crews work for Pyramid, not for a subcontractor. They are trained on our own systems, follow in are accountable to the project lead.

- Pyramid-certified, full-time employees
- Specialized fabrication and technical staff
- Master-level installation crews
- Direct performance accountability to project leads

FROM FIRST CALL TO FINAL HANDOVER.

A single, repeatable process runs every Pyramid project — the same six stages whether we are covering one bedroom window or an entire government building.

01

CONSULTATION & BRIEF

We discuss the space, the light problem you need solved, privacy requirements, style direction and budget.

02

TECHNICAL SITE SURVEY

Our technicians measure every opening, check the mounting surface and record obstructions before anything is ordered.

03

PROPOSAL & TRANSPARENT QUOTE

Fabric and system selection with samples, then an itemised quotation and delivery schedule — no hidden extras.

04

FABRICATION TO SIZE

Materials are cut and assembled to the exact recorded dimensions, with quality checks before dispatch.

05

INSTALLATION & TESTING

Certified crews mount, anchor and align every unit, test the operation and leave the site clean.

06

HANDOVER & AFTER-SALES

Operating and cleaning guidance of handover, then maintenance, adjustment and repair whenever you need it.

ONE POINT OF CONTACT

The same project lead from survey to control list.

AGREED TIMELINES

Delivery dates confirmed in writing with the quote.

EFFICIENT BY DESIGN

Systems chosen for daylight, heat and energy performance.

SERVICEABLE FOR LIFE

Spare louvres, components and repair support.

READY TO ORDER?

Send us your window details and we will come back with fabric options and a firm quotation — or request a site survey and our technicians will confirm every dimension before fabrication begins.

THREE WAYS TO ORDER

1 • ORDER ONLINE

Scan the code or open pyramid.biz.et/order and complete the order form. Fastest route — your request reaches our sales desk immediately.

2 • CALL OR VISIT US

Talk it through with our team, or come to the showroom on Gabon Street, Meskel Flower, Addis Ababa to see and feel the fabrics before you decide.

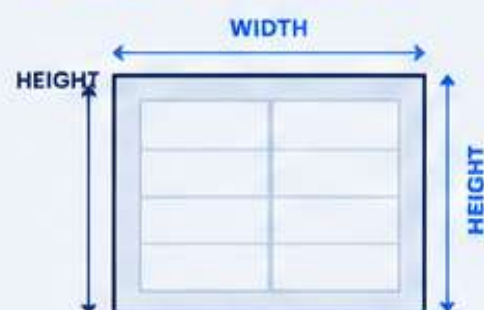

Mon–Fri 8:00 AM–5:30 PM • Sat 8:00 AM–2:30 PM

3 • TENDER & BID SUBMISSIONS

Institutional buyers can send bid documents and technical specifications directly to our office. We prepare technical and financial proposals, samples and delivery schedules in-house.

BEFORE YOU MEASURE

- Measure every window separately, even identical-looking ones.
- Take the width at three points and record the smallest.
- State inside mount (in the recess) or outside mount (on the wall or frame).
- Note handles, sills, sockets and other obstructions.
- Tell us the mounting surface — concrete, plaster, timber or aluminium — and send photos if you can.

FREE MEASUREMENT ADVICE

Unsure how to measure? Call us before you order.

RECOMMENDED FOR OFFICES.

Boardrooms, executive suites and open-plan floors all fight the same two problems: **glare on screens and noise bouncing off glass and hard flooring.** A tailored curtain solves both — heavyweight pinch-pleat drapery cuts glare and softens acoustics, while a sheer layer keeps the room bright when the black-out isn't needed.

GLARE CONTROL

Protects screens without losing daylight.

ACOUSTIC CALM

Softer, quieter meeting and call spaces.

MOTORISED OPTIONS

Remote and app-controlled and atriums.

SAFETY STANDARDS

Fire-retardant fabric options available.

 **EXECUTIVE OFFICE**

 **MEETING ROOM**

 **BOARDROOM**

 **OPEN PLAN OFFICE**

 **PRIVATE OFFICE**

 **COLLABORATION AREA**

SECTOR 01: CORPORATE & OFFICE SPACES

TRUE BLACK-OUT

Guest-room grade lining for total technical darkness.

MOTORISED COMFORT

Bedside or app control for every efficiency.

FIVE-STAR FINISH

Fabric and pleat styles for premium interiors.

COMPLIANCE READY

Fire-sety rated for hospitality institutional contracts.

RECOMMENDED FOR HOSPITALS.

Clinical environments need privacy that can be **cleaned, replaced and inspected without slowing a ward down**. Pyramid supplies cubicle and bay curtains built to hospital procurement standards — antimicrobial fabric, breakaway rings for infection control, and fire-retardant certification as standard.

Antimicrobial, easy-wipe fabric

Breakaway rings for infection control

Fire-retardant certified to clinical standards

Colour-coded by ward, bay or department

INFECTION CONTROL
 Breakaway hardware and washable fabric.

CERTIFIED FIRE-RETARDANT
 Meets clinical procurement specifications.

WARD COLOUR-CODING
 Fabric ranges suited to department signage.

BULK SUPPLY
 Volume delivery for multi-bay facilities.

RECOMMENDED FOR HOTELS.

A guest's night is only as good as the room's black-out. **drapery layered with sheer voile** – dark enough for sleep, elegant enough and roled, and rated to the fire-safety codes hospitality developments require.

 Full black-out lining for guest sleep quality
  Motorised tracks with remote app control
  Fire-safety rated for hospitality compliance

LOBBY & LOUNGE

GUEST SUITE

SECTOR 06: THE INSTALLATION ARTS |
REQUIRED MATERIALS, EQUIPMENT & SKILLS

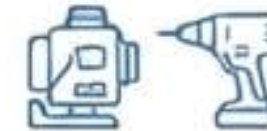

ELEVATING THE ART OF PYRAMID INSTALLATION.

Certified craftsmanship requires precision and passion. A flawless Pyramid installation is the culmination of high-grade materials, advanced equipment, and specialized technical skill, all delivered with an artful attention to detail to ensure your curated space is perfected.

MATERIALS & HARDWARE

- Certified structural tracks
- Rivet-fused brackets
- Architectural-grade cordage
- Precision-balanced weights
- Specialty anchors

ADVANCED EQUIPMENT

- Pro laser rangefinders
- Heavy-duty dynamic drifts
- Precision dynamic levels
- Dust-control vacuum dynamic systems
- Specialized cutting dynamic tools

TECHNICAL SKILLSET

- Certified window geometry pointment
- Fabric tensile engineering principles
- Automated system integration
- Problem-solving

THE ART AT PYRAMID

- Artful pleat spacing dynamic
- Integrated lighting and curtain interaction
- Fabric behavior knowledge
- Bespoke finishing
- Passionate attention

I. **OUR UNCOMPROMISING PROCESS:** From the initial measurement to the final pleat, every commission adheres to a strict protocol of certified craftsmanship. Our teams utilize a proprietary alignment system, verified by multi-axis laser metrology, to ensure sub-millimeter precision in track placement. All dynamic system components are lead-tested and stress-verified before integration, a quality check that guarantees a minimum of five thousand seamless cycles. The fabric handling itself is an art form, with specialized steaming and pleat-setting techniques used to create a flawlessly consistent finish, ensuring the curtains' geometry remains perfect over time.

II. **MATERIALS OF DISTINCTION:** At Pyramid, quality is non-negotiable. Our specified hardware ranges from custom-machined structural tracking systems capable of supporting substantial drapery weights to architectural-grade cordage with verified tensile strength. All anchors and brackets are multi-coated for enhanced corrosion resistance and dynamic stability. The motorized systems we integrate feature advanced, low-noise motors with self-calibrating end-points. Furthermore, our textiles are subjected to rigorous fire-safety, light-fastness, and abrasion resistance verification, ensuring they maintain their exquisite appearance for years.

PRECISION FITTING

Perfect structural balance for all track types.

CERTIFIED TEAM

Each technician holds multiple advanced certifications.

DURABILITY GUARANTEE

Installation integrity warranted for up to 5 years.

ARTFUL FINISH

Flawless pleating and a hand-crafted finale.

MODERN LIGHT CONTROL MEETS PRIVACY.

Zebra blinds feature alternating sheer and solid fabric stripes on a double-layered system. Align the stripes to filter light or ensure privacy with ease, while adding a clean, contemporary look to any space.

MATERIALS USED

- Polyester or polyester-linen blends
- Sheer mesh fabric for transparent stripes
- Solid woven fabric for opaque stripes
- Aluminum or sturdy PVC for headrail & bottom bar

BENEFITS

- Dual light control by shifting stripes
- Privacy without blocking natural daylight
- Modern, sleek style for any room
- Easy to pull up and roll down

QUALITY FACTORS

- Smooth rolling mechanism that does not stick
- Strong fabric edges that do not fray
- Color-safe material resists fading
- Durable metal brackets and heavy bottom rails

PREFERRED FOR

- Offices & meeting rooms
- Bedrooms & living rooms
- Hospitals & clinics
- Hotels & hospitality spaces
- Homes & modern interiors

HOSPITALS & CLINICS

SECTOR 04: ZEBRA BLINDS

Smart light control. Modern design.
Everyday comfort.

ADJUSTABLE PRIVACY
Seamless control between
light and privacy.

ENERGY EFFICIENT
Helps reduce heat and glare,
improving comfort.

EASY MAINTENANCE
Dust-resistant fabric for easy
cleaning and care.

DURABLE & RELIABLE
Built with premium materials
for long-lasting performance.

MODERN LIGHT CONTROL MEETS PRIVACY.

Vertical blinds feature vertical fabric or PVC vanes that can be tilted for light control or slid horizontally to clear a space. This versatile design allows you to filter light with precision while maintaining complete privacy, offering a clean, sophisticated look.

MATERIALS USED

- High-grade fabric (translucent or blackout)
- Sturdy PVC or aluminum vanes
- Durable, anti-static materials
- Custom vane lengths available

BENEFITS

- Precise angle control for light; horizontal closure for full clear
- Versatile and easy to use
- Clean, architectural lines
- Ideal for wide windows & doors

QUALITY FACTORS

- Non-curling, right vanes
- Heavy-duty aluminum headrail
- Secure bottom chain options
- Cordless wand operation (child safe)
- Reliable tilting mechanism

PREFERRED FOR

- Offices & large boardrooms
- Living rooms & patio doors
- Hospitals & clean rooms
- Schools & public facilities
- Wide spans & modern spaces
